Shape Curve

Our size guide: The core size range covers a 30D and 38FF range, shown in pink. If your normal bra size is outside of this core range - don't worry! Simply look up your bra size and you'll see our suggestion for the breast form which will most likely meet your needs, shown in blue. Boost Breast Forms work best when worn in a pocketed full cup bra or swimming costume. Please ensure you are happy with your bra fitting before choosing your size. Our size chart is a guide only; we understand that peoples' bodies and bra designs vary which can cause variations in fit. MF and XL are Extra Large and Medium Full - these are the same footprint as the standard Medium or Large, but with a fuller projection.
